

When safety related projects need to be executed, management resources limited or safety expertise needs to be added into project management there is an alternative. We manage and successfully deliver your safety project or program.

## Project Services

### Service description -

Our Project Services assist clients carry out safety projects by taking responsibility to plan, schedule, specify, procure, supervise, administer and deliver outcomes through program development, works programs and plant safety and signage.

### Service details -

We liaise with you, your managers, consultants and other parties, attend briefings and planning meetings, obtain drawings and background information, attend and assess site conditions, prepare programs specifications, schedules and reports, submit discuss and modify drafts for approval, package projects,

manage procurement, negotiate contracts, expedite delivery, superintend works, administer contracts, finalise works and documentation and conduct post completion evaluations.

### How the service works -

Once engaged, we get stuck into the details: the site conditions, the work needs, the scheduling to meet your timing and the work specification.

This may involve few or many site visits, a good deal of discussion / liaison with your people and plenty of work in our office.

Specifications, costs, schedules and packages are put together for your approval. After

authorisation to proceed, we arrange procurement, delivery, site work and installations as required whilst holding a tight rein on contracts, costs and time.

Fisher Jenkin Workplace Safety encourages and assists employers proactively manage workplace safety risks whilst achieving compliance with obligations and responsibilities that employers must embrace in today's business environment.

Please contact our head office or nearest franchise for personal, positive and professional attention to your workplace safety needs.
